EDUCATION

University of Liverpool John Moores,

BSc Computer Science

2019 – 2020 | Liverpool, United Kingdom

Collage of North Atlantic,

Diploma Web Developer

2017 – 2019 | Doha, Qatar

PROFESSIONAL EXPERIENCE

Software Engineer, Al Jazeera Media Network

2023 – present | Doha, Qatar

Played a role in the development and ongoing maintenance of cutting-edge AI features, demonstrating a keen focus on innovation. Proficiently established responsive frontends using Bootstrap, ensuring a user-friendly interface. Led the seamless deployment of projects and effectively managed databases, with expertise in setting up SQL databases for optimized performance.

Information Technology Teacher, Ministry of Education Qatar

2022 – 2023 | Doha, Qatar

As an IT teacher, my responsibilities included developing lesson plans, creating PowerPoint presentations, and conducting statistical analyses on student performance. I administered assessments such as homework and quizzes to gauge understanding and provided assistance to students who required additional support.

Teacher Assistant, College of North Atlantic

2019 | Doha, Qatar

Taking care of the parts needed for each class, building robots beforehand to demonstrate to other instructors.

Assisting the main teacher in case of need.

App / Web Developer, Tatbiq

2021 | Doha, Qatar

Was responsible to further develop Tatbiq application Get2Go, improving the application and further perfecting the design and maintaining the web dashboard and Application.

Application Developer, College of North Atlantic

2020 | Doha, Qatar

Managed multiple Backend functions for the mail system and customer support feature and designed the interface for both features.

Developer Intern, Ooredoo

2019 | Doha, Qatar

Addressing Design Challenges and Innovating Form Submission: Proficient in troubleshooting design issues, I specialized in developing effective solutions for form submissions and database storage. My role involved identifying and resolving design-related issues efficiently. Additionally, I contributed to the enhancement of form submission methods, devising innovative approaches for seamless interactions and efficient data storage in the database.

Deliver Agent, Ooredoo

2018 – 2019 | Doha, Qatar

Handling Delivery of High-Value Gifts to Key Figures in Qatar: Managed the reception and secure delivery of expensive gifts to prominent individuals across Qatar. Required attention to detail, confidentiality, and effective coordination for timely deliveries.

PROJECTS

Jira Service Management System, *Development - Administration*

01/2026 – present

Administered and optimized Jira Service Management (On-Premise) to support internal service operations and ticket workflows. Designed automation rules, SLAs, request forms, and service portals to reduce manual work and improve response efficiency. Managed large-scale custom field configurations and implemented structured ticket cloning logic. Supported multilingual service environments and enhanced overall service delivery performance

Al Jazeera Media Network Muhadatha, *Frontend - Backend Developer*

08/2023 – 11/2024

AI Web Application Hub: A centralized platform hosting a variety of features and tools powered by artificial intelligence. This hub empowers users to enhance and optimize their work efficiency through a range of capabilities.

Al Jazeera Media Network Forum 15 , *Frontend - CMS administration*

12/2023 – 01/2023

Implemented frontend UX/UI enhancements and managed website data for WordPress-based platforms addressing ethical challenges in media coverage. Ensured seamless user experience, optimized content presentation, and maintained structured data management for accurate news verification and fact-checking.

forum.aljazeera.net/forum-15/en/index.html 

Al Jazeera Media Network Forum 16 , *Frontend - CMS administration*

12/2024 – 01/2025

Refined the frontend UX/UI and managed website data for an advanced WordPress platform focused on ethical media coverage. Enhanced user experience, improved content organization, and ensured efficient data management to support structured fact-checking and news verification.

forum.aljazeera.net 

Targeting Journalists is a Crime , *Frontend - Backend Developer*

01/2023 – 04/2024

Enhanced an existing WordPress theme by improving functionality and adding new features to support a global alliance for journalist protection. Developed custom plugins to meet project requirements, optimizing content management and user experience. Ensured seamless integration, performance, and scalability while maintaining the platform's mission of safeguarding press freedom.

tjcproject.org 

Al Jazeera Media Network Marketing Events Calendar, *Frontend - Backend Developer*

05/2024 – 09/2024

Developed a global event calendar for tracking events, coverage, and awards, enabling users to integrate events into their own calendars. Utilized JavaScript libraries, custom plugins, and seamless integrations to enhance functionality and user experience. Ensured accuracy, responsiveness, and smooth performance across platforms.

Al Jazeera Network Newsletter Platform, *Frontend - Backend Developer*

09/2024 – 12/2024

Developed a WordPress-based newsletter application for sending emails to all Al Jazeera employees. Implemented custom features for email management, user segmentation, and scheduling. Enhanced functionality with custom plugins to ensure efficient delivery and seamless user experience.

Al Jazeera Media Network Not Numbers, *Frontend Developer.*

03/2025 – 04/2025

For the "Not Numbers" project at Al Jazeera, I worked as a front-end developer, specializing in creating immersive animations and special effects. My goal was to transport users into the experience of the war in Gaza, leveraging dynamic visuals and interactive elements that enhanced the emotional impact and narrative engagement of the project.
